Authorization for this examiner's amendment was given in a telephone interview with Robert Reeser on 4/18/2005.

Claim 1 has been amended as follows:

On I. 3 of the claim, "amplitude;" has been changed to -- amplitude based on a signal that is proportional to an average dynamic pressure level within the combustor;

on I. 3 of the claim, "ring" has been changed to -- burner ring --.

Claim 3 has been amended as follows:

Allowable Subject Matter

2. Claims 1-20 are allowed.

3. The following is an examiner's statement of reasons for allowance: prior art does not teach in combination with the other limitations of the independent claims basing the fuel control system on an input from an acoustic sensor that is processed to be proportional to an average dynamic pressure level within the combustor (the prior art teaches inputs that are frequency-specific dependent).

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

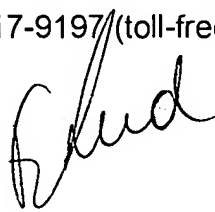

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Ryan 6742341, Tegel 6354071.
